Arteon. Never look back.

Volkswagen intends to push past the limits of creativity in the fastback category with the introduction of the Arteon. The designers at Volkswagen have endeavoured to create a striking aesthetic that is sure to set the Arteon apart from its rivals. Its remarkable and progressive design is one that commands on-lookers to take a second glance.

The Arteon represents a significant step forward for Volkswagen and further solidifies our position as industry leaders in innovation. Its striking good looks and powerful engine options (2.0 TSI 206kW and 2.0 TDI 130kW) make the Arteon a bold new member of the Volkswagen family.

Design that speaks for itself.

With its jaw-dropping good looks and dynamic outlines that carve out its formidable presence, the Arteon is a sight to behold. It redefines the word premium within its class, and makes the subtle suggestion that it might be time for a change.

Fastback

The Arteon offers 563 litres of boot space, and thanks to the optional Easy-Open function, a flick of the foot under the rear of the vehicle is all it takes to unlock the electric hatch. The time-delayed electric closing function means you can close the luggage compartment hatch at the touch of a button, leaving you free to load and unload at your leisure. This function is available when you select the Park Package.

Panoramic sunroof.

At the touch of a button, it easily slides open providing uninterrupted views and flooding the interior with light that creates a generous sense of space. Optional on Elegance.

Headlights and tail lights.

The Arteon features LED headlights with dynamic range control, a system that automatically adjusts the angle of the low beam to avoid dazzling oncoming traffic. On the R-Line, Dynamic Cornering Lights are standard. This feature provides optimal illumination upon entering tight corners and bends, ensuring a safer and more precise driving experience at night.

Step into the future.

The spacious interior of the Arteon speaks to its ultramodern interpretation of elegance – calling on its passengers to step into the future of automotive excellence. The interior offers contemporary upholsteries and sophisticated decorative inserts – exceptional levels of comfort and convenience combine to create a premium interior feel that is second to none.

The driver's ergoComfort seat with lumbar support (featuring electric 6-way adjustment) provides more than enough reason to get behind the wheel of the Arteon.

Generous head and legroom, in both the front and rear, creates a real sense of spaciousness, ensuring total relaxation on every trip.

Superior technology at your fingertips.

The Arteon is packed with the latest Volkswagen technology which is certain to enhance your driving experience - technology like Active Info Display, App-Connect, all now synonymous with Volkswagen, not to mention Discover Pro and touchscreen navigation standard on R-Line.

The intelligent Composition Media infotainment system has an 8.0" touchscreen (standard on Elegance) - while the crystal-clear Discover Pro 9.2" (standard on R-line) colour touchscreen with a premium tablet look and feel will enhance your experience.

Area View provides a 360° display of your Arteon in the infotainment display, transmitting information via four cameras to the front, the sides and the rear – very useful when there is limited space to manoeuvre. Optional as part of Park Package with Area View.

Assistance systems

One of the most useful driver assistance systems Arteon offers, is the Adaptive Cruise Control and "Front Assist" City Emergency Braking (Standard on R-Line). You simply specify your top speed and the system makes sure you don't exceed it.

Using the data provided, "Front Assist" detects critical situations, such as: if the distance between you and the vehicle ahead is too small and responds by either an audible and visual signal to brake or by providing a jolt to the brakes to indicate an impending collision.

Another great feature is the Head-up Display. It presents key driving information directly in your field of vision - information such as: speed, traffic signs, as well as warning and navigation messages are all pushed directly to the high-quality retractable display.

The engine in German engineering.

The Arteon Elegance and R-Line are available with a 2.0 TDI 130kW engine and the 2.0 TSI 206kW engine is available in R-Line guise. The 2.0 TSI 206kW engine offers incredible output (compared to its rivals), 4MOTION® four-wheel drive and XDS electronic differential lock. DCC adaptive chassis control comes standard across the range.

Performance with a capital R.

The Arteon R-Line provides a sensory experience thanks to its advanced design features and exclusive materials. The aluminium horizontal air vents stretch the width of the dashboard framing the analogue clock. Ambient lighting in all doors and across the dash with a choice of three colour options creates a soothing and eloquent feel. Its interior boasts black 'Nappa' leather seats with 'Carbon Style' side bolsters, complemented by contrast stitching and embroidered 'R-Line' logo.

The ergoComfort driver's seat has electric 6-way adjustment and memory and massage functions. The multi-function leather-trimmed steering wheel features the distinctive 'R-Line' logo and decorative stitching, and the interior is complemented by the 'Titan Black' roof-lining and stylish 'Silver Rise' decorative inserts in the dash and door panels.

The R-Line design package includes an aggressively styled front bumper with C-signature air curtains in gloss black and the 'R-Line' logo proudly mounted on the radiator grille and both side fenders. The dynamic rear spoiler is complete with a gloss black finish that gives a sense of movement even when the car is parked and the trapezoidal chrome exhaust tailpipe adds the finishing touches to our most audaciously shaped fastback to date.

Goodbye convention. Hello Arteon.

Arteon represents progressive beauty, status and performance. For those who desire style and true individualism, Arteon is the car that will leave a lasting first impression. But as with most things, looks aren't everything – this car is the definition of comfort with luxurious 'Nappa' leather seats.

Add a variety of advanced technological features at your fingertips and you can say farewell to convention and embrace the future of luxury on the go.
